TO WHOM IT MAY CONCERN:

Here at KRG Properties, we have been developing and managing Medical Facilities for over 25 years. We have worked with many General Contractors over this period of time. My Background is in Manufacturing and Mechanical Engineering and I personally put a great amount of value on the efficient execution of projects. I can say without question that Peter Alesci and his entire team are a pleasure to work with. They develop a plan, set a schedule and do everything possible to stick to it. If an issue or field condition arises, they preemptively reach out with alternate solutions. They put a very high emphasis on documentation and making sure that everyone is on the same page at all times. There are never any surprises. They are extremely efficient at sourcing so that Materials are ordered ahead of time and arriving as they are needed. They have an experienced team and their workmanship is exceptional.

Over the past two years, we have engaged with FPS Contracting on several projects and I could not recommend them more highly.

Please feel free to contact me directly with any further questions you may have.

Sincerely,

Brian T. Kent
